THE WALHALLA COURT. The proceedings of the Circuit Court of Oconec County in Walhalla last week created general interest, arising from the fac that Alex. Bryce, jr., the notorious Radical politician, was put upon trial for his recent conduct in regard to the Auditor's books. It will be remembered that the books of the County Auditor were turned over to the County Commissioners in January, and that these books were abstracted from the office not long ago, after Chamberlain had sent an appointment to Bryce as County Auditor. The books were found in the possession of Bryce, and he was indicted for the larceny and also for receiving stolen goods. Upon being arrested Bryce succeeded in eluding the officer and went to Columbia, where he prefered charges against several citizens of Walhalla for abstracting a mail bag from the post office. This mail pouch contained a part of the Auditor's books, and upon Bryce being carried back to Walhalla, he refused to open the pouch, which had been deposited in the Walhalla Bank for safe-keeping. Thus matters stood when Judge Cooke convened the Court last week, and Bryce was again asked to surrender the books in the mail bag, which was brought into the court room. He peremptorily re-fused to open the mail bag, and Judge Cooke ordered him to be taken to the jail until he was ready to comply with this demand. Bryce afterwards relented, and sgreed to open the bag at the post office, as the postal laws prohibited him from taking the keys away from the office. The acting Sheriff was sent with him, and Bryce again sought to evade the order of the Court, which was soon reported to Judge Cooke, who went in person to the post office and demanded instant compliance with his order. Bryce could no longer dodge the question, and the books were produced. Great excitement prevailed in Walhalla during these proceedings, and it was natural that the subsequent trial of Bryce produced general interest, for the citizens were rightfully exasperated at the contumacious behavior of this defiant, lawless Radical, who has been a source of great annoyance to the community for many years. The charge of grand larceny was not proven, as the proof was not suffi-cient to establish his direct participation in the theft. He was found guilty of receiving the stolen goods, however, and was sentenced by Judge Cooke to one year in the Penitentiary at hard labor.

On Tuesday morning, Acting Sheriff Woodin and his deputies passed down the railroad in charge of the prisoners, Alex. Bryce among them, and doubtless at this time he is in the custody of Superintendent Parmele. We understand Bryce expresses the opinion that he will be released in a short time, and probably bases this expectation upon the pardoning power of Chamberlain. But the decision of the Supreme Court has been obeyed by Col. Parmele in was highly enjoyed by a large attendance of recognizing Gov. Hampton, and he is not likely to set Bryce at liberty until better authority than Chamberlain so directs.

Jordan Crenshaw, the nephew of Bryce, was convicted of perjury, and sent to the

Penitehtiary for two years. He swore that communion services at Smith Chapel (Metheveral citizens of Walhalla, who captured the mail bag aforesaid containing the Auditor's books, had stolen therefrom a large quantity of postage stamps, when the evidence showed that repeated offers to purchase were met with the information that

only a few stamps were in the office. Jesse F. Cox. a brother-in-law of Bryce, was convicted of grand larceny, and sentenced to five years in the Penitentiary. His offence was cow stealing, and not concitizen in the vicinity of Pendleton, died on nected with the exploits of Bryce.

Besides these representatives of the Bryce family, Mr. Woodin had in charge two others, who were connected with the post office matter, we believe.

THE PICKENS COURT.

The Court of General Sessions and Common Pleas convened at Pickens on last Monday, his Honor Judge Cooke presiding. In the absence of Col. Cothran Col. Keith was appointed Solicitor for the term. The former grand jury was in attendance upon the Court, as no new juries had been drawn for the term. Several bills were reported upon by the grand jury, and in their general presentment they reported that no juries being present is the result of a failure and refusal of Mr. Leslie, the former Commissioner, to do his duty, and recommend that the penalty of the law be enforced against him. Judge Cooke issued a rule requiring him to show cause at the next term of the Court. The Judge transacted a large amount of the equity business, and adjourned the Court on Tuesday evening.

RAILROAD ACCIDENT. An unfortunate accident occurred on the Greenville & Columbia Railroad last Saturday morning, between Honea Path and Belton. The up-freight train, under charge of Conductor Casson, was within four miles of Belton, when the conductor's car was thrown from the track, and several of its occupants injured. Rev. B. F. Mauldin, of Williamston, received the most serious injuries, by being severely bruised about the face and head, besides other contusions about his person. It was thought at the time that his wounds were dangerous, but we are glad to report his condition as quite favorable on Monday morning. Rev. R. M. King, of Honea Path, was slightly injured by the accident, and also Conductor Casson and others. Mr. Mauldin was engaged in saying off the employees on the railroad when the accident occurred, and was making the usual trip for that purpose. He was taken to his home at Williamston on Satur-

HOPEWELL LOCALS. As you have asked locals from the various sections of the County, we propose to give you an item or two from the above section. .. Hopewell is one of the largest townships in the County, and is composed almost exclusively of planters. We have, therefore, been dealing largely and freely in commercial fertilizers for the purpose of producing cotton to the exclusion of grain crops, believing that this system was the shortest way to success. Fertilize, plant cotton, buy sup plies and pocket the surplus were certainly flattering a few years ago But "figures do not lie" we learned a few years since to our detriment. Instead of a surplus there was a deficit : hence, a gradual reduction of cot ton and a corresponding increase of grain planting. We hear of a still farther reduction of the one and an increase of the other this season-c. g. L. D. Stringer decided to reduce his cotton crop this year from twentyfive to ten acres, and to plant this cotton land in corn, peas, pinders, sorghum and potatoes. W. A. Neal proposes to plant ten acres of his intended cotton land in Golden Dent corn. We hope to hear of similar reductions.....The Hopewell Cemetery has been repaired and greatly improved in appearance The friends of this enterprize (and they are not a few) are greatly indebted to the proprietors of the Hopewell Portable Saw firm, Neal & Guyton, who sawed the entire lumber free of charge. There is but one thing to regret in connection with this firm. The Senior is a bachelor. He has, however, been recently interviewed upon this subject, and we have it from apparent semi-official circles that a reformation at no distant day is promised. Let all concerned take du notice, &c The Hopewell Baptist Sunday School celebrated its first anniversary last Sunday. The day was lovely, the exercises pleasing, the attendance large, and upon the whole it was a day pleasantly spent. The unvailing of the Key Word of the School for 1877, as it was called by the smallest children, was witnessed with no little interest. This exercise was followed by Rev. J. A. French, of Greenville, in a lecture, which chimed in with this exercise in beautiful harmony. After the performance of several pieces of excellent music, an able sermon was delivered by the same gentleman No one expresses a desire to witness the inau-guration of Mr. Hayes. HOMO.

Wonders of Modern Science.

The perfect accuracy with which scientists are enabled to deduce the most minute particulars in their several departments, appears almost miraculous if we view it in the light of the early ages. Take for example the electro-magnetic telegraph—the greatest invention of the age. Is it not a marvelous degree of accuracy which enables an operator to exactly locate a fracture in a submatter to exactly locate as fractu tor to exactly locate a fracture in a submarine cable nearly three thousand miles long? Our venerable "clerk of the weather" has become so thoroughly familiar with those most wayward elements of nature that he can accurately predict their movements. He can sit in Washington and foretell what the weather will be to-morrow in Florida or New. York, as well as if several hundred miles did not intervene between him and the places named. And so in all departments of modern science, what is repartments of modern science, what is required is the knowledge of certain signs. From these the scientists deduce accurate conclusions regardless of distance. A few fossils sent to the expert geologist enable him to accurately determine the rock-formation from which they were taken. He can describe it to you as perfectly as if a can describe it to you as perfectly as if a cleft of it were lying on his table. So also the chemist can determine the constitution of the sun as accurately as if that luminary of the sun as accurately as if that luminary were not ninety-five million miles from his laboratory. The sun sends certain signs over the "infinitude of space," and the chemist classifies them by passing them through the spectroscope. Only the presence of certain substances could produce these solar signs. So also in medical science diseases have certain unmistakable signs or symptoms, and by reason of this fact, Dr. Pierce, of the World's Dispensary, has been enabled to originate and perfect a system of determining, with the greatest accuracy, the nature of chronic diseases without seeing and personally examining his patients. He has spared neither pains nor expense to as sociate with himself, as the Faculty of the World's Dispensary, a large number of medhas spared neither pints not expense of an sociate with himself, as the Faculty of the World's Dispensary, a large number of medical gentlemen of rare attainments and skill—graduates from some of the most fa mous Medical Colleges and Universities of both. Europe and America. By aid of Dr. Pierce's system of diagnosis, these physicians and surgeons annually treat, with the most gratifying success, many thousands of invalids without ever seeing them in person. In recognizing diseases without a personal examination of the patient, they claim to possess no miraculous powers. They attain their knowledge of the patient's disease by the practical application of well established principles of modern science to the practice of medicine. And it is to the accuracy with which this system has endowed them that they owe their almost world-wide reputation for the skillful treatment of all lifigering or chronic affections. This system of practice for the skillful treatment of all ingering or chronic affections. This system of practice and the marvelous success which has been attained through it, demonstrate the fact that diseases display certain phenomena, which being subjected to scientific analysis or synthesis, furnish abundant and unmis-takable data to guide the judgment of the skillful practitioner aright in determining the nature of diseased conditions. The amplest resources for treating lingering or amplest resources for treating lingering or chronic diseases, and the greatest skill, are thus placed within the easy reach of every invalid, however distant he of she may reinvalid, however distant he or she may reside from the physicians making the treatment of such affections a specialty. The peculiarities of this scientific system of practice are fully explained in the Appendix of "The People's Common Sense Medical Adviser,"—a book of over nine hundred large pages, which is an normal as to have reach viser,"—a book of over nine hundred large pages, which is so popular as to have reached a sale of almost one hundred thousand copies within a few months of its first publication. It is sent (post-paid) by the Author to any address on receipt of one dollar and fifty cents. Address, R. V. Piere, M. D., World's Dispensary, Buffalo, N. Y.
